SciTrue – – An Expert of Slip Ring

Integration Slip Ring

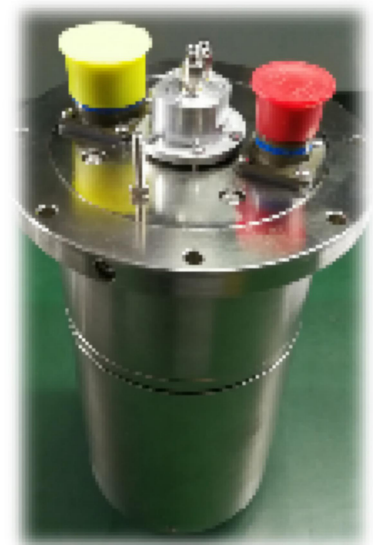

Description

▲ Integration Slip Ring combines multiple slip ring and rotary joints together in one package to transmitting various media such as electric power electrical signal, radio frequency, optical fiber, liquid, gas, etc.

Optic-electric

RF-electric

Features

- ◆ Compact size, save install space and weight
- ◆ well protection to delicate fiber optic joint and RF Rotary Joint
- ◆ Each rotary joint can be integrated in axial or radial direction according to the system space, or can also be made into an unity structure.
- ◆ Realizing the independent disassemble to each rotary joint, easy to repair, maintenance or replacement.

(For parameters of each different rotary joints, please reference to involved datasheet.

Typic Application

- ◆ Radar System
- ◆ Weapon System
- ◆ View aim system
- ◆ Industry equipment
